Red-brown quartzite, with abundant sub-angular to rounded milky quartz (5-30 mm), on a low relief landsurface. Minor gullying into local Aed units and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata*, *Cassia artemisiodes*, and *Acetosa vesicaria*.

**AEOLIAN SANDS**

*Isps 1*  Red, well-rounded quartz sand, with minor angular quartzite (less than 5 mm) and minor fragments of gneissic regolith, on a low relief landsurface. Vegetation dominated by *Maireana pyramidata*.

*Isps 2*  Red, well-rounded quartz sand, with abundant iron-oxide stained sub-rounded to rounded milky quartz (5-30 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata*.

*Isps 3*  Red, well-rounded quartz sand, with abundant iron-oxide stained sub-rounded to rounded milky quartz (5-30 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata*.

*Isps 4*  Red, well-rounded quartz sand, with abundant iron-oxide stained sub-rounded to rounded milky quartz (5-30 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata*.

*Isps 5*  Red, well-rounded quartz sand, with abundant iron-oxide stained sub-angular to rounded milky quartz (5-30 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata*.

*Isps 6*  Red, well-rounded quartz sand, with abundant iron-oxide stained sub-angular to rounded milky quartz (5-30 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata*.

**COLLUVIAL SEDIMENTS**

*Cher 1*  Light brown, well-rounded quartzite, with minor sub-angular to rounded milky quartz (5-20 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata* and *Cassia artemisiodes*.

*Cher 2*  Pale yellow-orange slightly micaceous well-sorted quartzite sand and sub-angular to rounded milky quartz (5-20 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata* and *Cassia artemisiodes*.

*Cher 3*  Light brown, well-rounded quartzite, with minor sub-angular to rounded milky quartz (5-20 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata* and *Cassia artemisiodes*.

*Chep 1*  Light brown, well-rounded quartzite, with minor sub-angular to rounded milky quartz (5-20 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata* and *Cassia artemisiodes*.

*Chep 2*  Light brown, well-rounded quartzite, with minor sub-angular to rounded milky quartz (5-20 mm) and minor fragments of gneissic regolith. Vegetation dominated by *Maireana pyramidata* and *Cassia artemisiodes*.
