

## **JANINE LUCKMAN**

"Janine is a relative newcomer to CRC LEME, having joined in November 2006. In this short time with us, Janine has made a significant contribution to the River Murray Corridor project in particular, with her GIS skills of special value in producing the new geomorphology maps. Thankfully, Janine has been a quick learner, and her flexible and cooperative approach has enabled us to deliver project outputs despite significant changes to project milestones and deliverables."
